In Just Minutes a Day*
Clear your Chest with AffloVest.™

Ease of Use
The AffloVest puts complete control in the patient’s hands.

- Fully mobile during use
- Digital, programmable controller
- Nine total setting variations let doctors and patients determine the best level of personal treatment for each user
- Three modes of oscillation treatment
- Compliance monitoring
- Three adjustable intensity levels (Soft, Medium, Intense)
- Quiet during operation
- AC/DC power option allows users to recharge the AffloVest’s battery or operate the AffloVest at home or in the car*

* The AffloVest can also be powered using supplied AC adapter plugged into an electrical outlet

No Carts

- Fully mobile during use
- Longer life battery
- Made in the USA
- New look and colors
- More sizes added (fits chest circumference from 18” to 65+”)
- Adjustable to all shapes and sizes for better fit
- More ergonomic shape for shoulders and neck
- Posturally independent
- Thousands in use
- Therapeutic treatments in just minutes a day*

In Just Minutes a Day*
Clear your Chest with AffloVest.™

If you suffer from COPD and chronic lung infections

You, like millions of COPD patients, may have Bronchiectasis, a chronic lung condition that occurs when the walls of the airways (bronchi) thicken as a result of chronic inflammation and/or chest infections and results in mucus accumulating.

There is a new, easy, home treatment for you.*

MKT0026 Rev A

The AffloVest is a physician prescribed oscillation treatment device. Respiratory patients should consult their physician to determine how AffloVest can help.
The AffloVest is reimbursed by Medicare, Medicaid and private insurance for qualified patients.

*AffloVest requires a doctor’s prescription for treatment by High Frequency Chest Wall Oscillation (HFCWO). The AffloVest has received the FDA’s 510k clearance for U.S. market availability, and is approved for Medicare and private health insurance reimbursement under the Healthcare Common Procedure Coding System (HCPCS) code E0483 – High Frequency Chest Wall Oscillation. Patients must qualify to meet eligibility requirements.

The AffloVest is the first truly portable, battery operated, fully mobile during use, High Frequency Chest Wall Oscillation (HFCWO) vest. The AffloVest promotes airway clearance and lung secretion mobilization in physician prescribed treatment of respiratory diseases like Bronchiectasis, Cystic Fibrosis, MS, MD, ALS, and other neuromuscular diseases.

**How can I find out if I have Bronchiectasis**

"Patient was very short of breath and congested and not able to do well in the rehab hospital, after one week of AffloVest use, patient’s breath sounds were clear and the man walked me out to my car personally," Pete P, RRT — Keller, TX

**How the AffloVest Benefits Bronchiectasis Patients.**

The AffloVest offers physicians and patients a medical device that clears your chest airways. The AffloVest gives patients a device that they can use at home or anywhere on a preventative type of therapy which could help to prevent mucus buildup and subsequent lung infections. In other words, if patients use this therapy as prescribed by their doctor, typically 1 to 2 times per day for only 30 minutes at home, it may help prevent lung infections which lead to hospitalization and subsequent re-admissions.

Because the AffloVest is quiet, portable, easy to use, and fully mobile during use, this device may more likely be used by an older patient population with bronchiectasis.

**Patient Demographics**

It is estimated that bronchiectasis is under diagnosed due to its variable symptoms. Bronchiectasis increases with age and is more common in women than in men. The COPD Foundation estimates there as many as 8 million undiagnosed Bronchiectasis patients in the USA.

**Freedom of movement utilizing the latest technology**

Afflovest is different. It does not use air generator and air bladder technology first developed in the 1980’s. No loud and heavy air generators. No air hoses and electrical cords to connect and slow you down. With AffloVest’s 21st century technology it gives doctors a new tool to help manage their Bronchiectasis patients utilizing the latest in oscillation therapy, portability and mobility during use. The AffloVest features built-in oscillating modules that allow for freedom of movement to travel, go for a walk in the park, move around the house, or relax in front of the television. Patient home treatment plans can be customized using the targeted motors for specific lung lobes or chest wall zones using different levels of intensity.

- **Rechargeable battery pack** that can last up to 3+ hours on highest settings
- **Afflovest is easy to store and easy to carry;** the Go Anywhere Travel Case makes it perfect for the respiratory patient who travels
- **Available in seven sizes** (XXS, XS, S, M, L, XL, XXL); fits Chest circumference of 18” to 65”+
